

YACHT CLEAN

SUCTION CLEAT WITH DUAL VACUUM PADS

The suction cleat is a robust tool designed for temporary attachment to flat and non-porous surfaces such as glass, metal, or smooth plastic.

It is equipped with dual vacuum pads to ensure a secure and even grip. Its ergonomic handle and locking mechanism make it ideal for various applications, such as glass handling, construction tasks, and industrial work.

Key Features

Dual Vacuum Pads: Two suction pads for enhanced grip and stability.

Ergonomic Design: Comfortable and durable handle for user convenience.

Quick Locking Mechanism: Easy-to-operate levers to secure suction in place.

Reusable and Portable: Lightweight and compact design for transport and repeated use.

Materials: High-strength plastic and rubber suction pads for durability and reliability.
