YACHT CLEAN

## HOW TO USE:

The length of service between recharges will vary depending on water hardness and water pressure.

Please, note: the water produced by YC water softener is not drinkable!

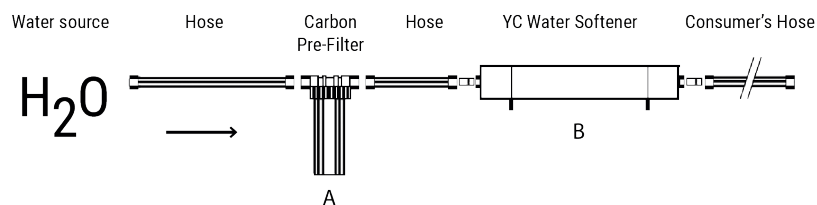

### Procedure:

Connect a long hose to the water source and the water filter (A)

Insert the carbon cartridge (A) into place - Connect the unit (A) to the YC water softener (B)

Attach the other end of YC Water softener (B) with the consume's hose.

Turn the water on and let it flow for a few minutes. YC water softener is now ready to use

YACHT CLEAN

## HOW TO REGENERATE:

The YC water softener system must be regenerated with rock salt.  
This process can be done in approximately twenty minutes.

### Procedure:

Unscrew and remove water filter (A)

Fill the cartridge with the necessary quantity of salt and screw it back

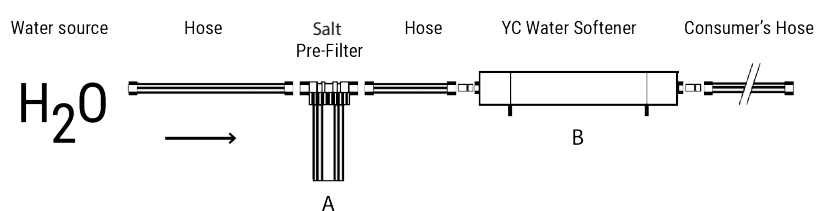

Open the input valve and let the water flows slowly about 5 or 10 minutes

Turn water off and wait few minutes

Turn water back on for 1 minute and repeat this 3 or 4 times.

Fully open the input valve to flush the unit and remove further residual salt brine

YC water softener is now ready to deliver water without calcium

YACHT CLEAN

## YC WATER SOFTENER IS EQUIPPED WITH THE FOLLOWING ACCESSORIES:

### TWO FITTINGS YC-104

Suitable for 19mm (3/4") Ø.  
Plug-in fitting. Water pipe fitting.

### COUNTER-LITER YC-103

Suitable for 13mm (1/2") Ø  
Plug-in fitting. Water pipe fitting.

### FILTER HOUSING YC-105

Suitable for 13 mm (1/2") and  
15 mm (5/8") hose.

### CARBON CARTRIDGE YC-101

Suitable for 19mm (3/4") Ø.  
Plug-in fitting. Water pipe fitting.

### SALT CARTRIDGE YC-102

Suitable for 13mm (1/2") Ø  
Plug-in fitting. Water pipe fitting.

### HOSE YC-106

Suitable for 13 mm (1/2") and  
15 mm (5/8") hose.
